Hot Glue Gun Helpers™ Ease Crafters' Woes!

Norcross, GA – Tired of getting burned by hot glue? Frustrated by the mess, the heat, the stringy-thingies? Plaid's new **Hot Glue Gun Helpers** take the sting and mess out of working with hot glue!

Safe up to 600° F, the heat- and stain-resistant set is composed of: a 14.6" x 11.5" **craft mat** that protects work surfaces and serves as a landing pad for a heated glue gun; three **finger caps** to protect fingertips while pressing; **soft press paddle** for adhering delicate details such as flowers petals; **tweezers** for precise placement of gems and other small items; and a **press wand** for heavy-duty pressing. The must-have tool set is perfect for all hot glue crafts and much more--wearables, accessories, jewelry, glass, paper, florals, wood, repairs, any craft!

A finalist in CHA's 2011 Innovations Showcase, Hot Glue Gun Helpers were created by Creative Juice personalities and Plaid spokespersons Cathie Filian and Steve Piacenza.

Visit Plaid booth #1722 for a cool hands-on hot glue experience!

Plaid® Enterprises, Inc., located in Norcross, Georgia, is a subsidiary of the Dyson-Kissner-Moran Corporation, a privately held New York-based investment company.
